Presenter II
Freedom for presenting

Issue July 2005

Pages 2

Do you give often presentations? Do you want while presenting to move around in the room and to watch the reaction of your audience?
Fujitsu Siemens Computers always tries to anticipate our customers' wishes and offers the solution that creates freedom for presenting – the Presenter II.

With the Presenter II you can leaf through, use the laser pointer or choose black screen – all from one device. It's a must for presentation rooms and for people who require the best.

Reliability
- High quality and stability
- Reliability of delivery
- Everything you need from one company

Mobility
- Connection via radio frequency allows moving in the room during presentations and have better personal contact to your audience
- More concentration on content
- More successful presentations

Usability
- Just plug the receiver into the USB interface
- No complicated installation necessary due to the support of the current operating systems
- Leafing and pointing with one device while moving around - concentrated on the important things
- Separate button for black screen

Diversity
- Accessories for differentiated demands
- Meet highest demands in terms of ergonomics and usability

Presenter II USB

Order code for consumer channel:
Package containing 5 retail units
